Description

HELLA is a linear slot diffuser, mainly intended for air supply in comfort ventilation systems for offices, shops, medical rooms, school classrooms etc. The supply air flow pattern/direction can be formed by adjustable deflectors in vents, air flow volume can be tuned by slider adjustment damper. Air extract is also possible with HELLA. Typical installation location for HELLA is suspended ceiling. The diffusers can be installed as individual pieces or in array of multiple segments.

Highlights

- Modern slim and compact design
- Easy and quick installation
- Precise adjustment of air discharge pattern
- Installation with or without plenum box
- Plenum box with tightness class C, compliant with EN 1751 standard
- Slider adjustment damper available
- Individual diffuser or continuous array of multiple diffusers installable
- 1-, 2-, 3- or 4-slot arrangement
- Rectangular corner elements available

Product Types

- HELLA: Linear Diffuser
- HELLA-T: Linear Diffuser for T-bar Ceiling Installation
- HELLA-CE: 90° Corner Element

Design

Linear slot diffuser HELLA is manufactured from aluminium profiles. The surface treatment can be anodized aluminium or powder paint. The number of slots can be 1 up to 4. Each individual slot is equipped by longitudinal deflector, which can be adjusted for different air flow patterns in 180° angle between the vertical and two opposed horizontal directions. These deflectors as well as the profiles dividing the slots are dismountable without tools, making so the installation of the diffuser easy. The galvanized steel slider adjustment damper as a part of the diffuser can be attached or detached without tools. The end caps (frame profiles on short sides of the diffuser) are fixed by screws. If the end caps are dismounted, it is possible to install a continuous array of multiple diffusers. Galvanized steel plenum box with circular duct connection can be delivered as accessory of the diffuser optionally with insulation inside/outside. For installation without plenum box a galvanized steel mounting bridge is available.

PB-HELLA & PB-HELLA-T

Plenum Boxes

Description

Plenum boxes PB-HELLA and PB-HELLA-T are used to achieve proper discharge parameters of diffusers HELLA and HELLA-T, corresponding in size and number of slots.

Design

PB-HELLA and PB-HELLA-T is made from galvanized steel sheet, equipped by circular duct connections with rubber gasket. The box can have insulation inside and outside. Tightness class of the plenum box is "C" in compliance with EN 1751 standard. Multiple boxes can be installed with multiple diffusers arranged in an array. For this type of installation the boxes have connecting ears to join with neighbouring box. For diffusers HELLA-T of length 1800 mm and 2400 mm the plenum boxes PB-HELLA-T with corresponding length consist from two connected plenum box segments with two separate air inlets (see dimension table PB-HELLA-T).

NOTES:

L_t = Nominal length of diffuser HELLA-T

n = Number of plenum box segments

L, H, T = Physical dimensions of plenum box PB-HELLA-T.

The external insulation J increases the dimension T by approximately 2 mm × 6 mm.

For sizes 1800 and 2400 L is overall length of both plenum box segments together.

The weight m (kg) is stated for the whole plenum box set regardless if it consists of one or two plenum box segments.

CP-PB-HELLA

Connection Plate

Description

CP-PB-HELLA is a plate foreseen to firmly mechanically connect two plenum boxes PB-HELLA in array installation of multiple elements.

Design

CP-PB-HELLA is manufactured from galvanized steel sheet. Two pieces shall be slid on the binding spot of the plenum boxes and fixed in position by bending of the fixing ears.

Ordering Codes

CP-PB-HELLA (Item No. 238230)

S-HELLA

Installation Spacer

S-HELLA

Installation Spacer

Description

S-HELLA is a spacer for temporary stiffening of the plenum box during installation and construction finish avoiding deforming.

Design

S-HELLA is manufactured from galvanized steel sheet. Each box width corresponding to different numbers of diffuser slots fits the different spacer type. The spacer shall be inserted into the box and fixed by adhesive tape. For longer boxes (> 1 m) two spacers can be used.

MB-HELLA

Mounting Bridge

Description

The mounting bridge is used for installation of HELLA diffuser without plenum box in the suspended ceiling.

Design

MB-HELLA is made from galvanized steel. It has a rivet nut to catch the fixing thread bolt of the diffuser. For each number of slots on diffuser HELLA a different size of MB-HELLA is dedicated. Each diffuser HELLA requires 2 pieces of MB-HELLA for installation.

CP-HELLA

Connection Pin

Description

CP-HELLA is a connecting pin for joining neighbouring diffusers HELLA in an array.

Design

Circular profile pin from galvanized steel. The pins are applied in the holes at the ends of the longitudinal frame profiles of the diffuser HELLA.

Other Specification

The quantity of CP-HELLA required to join multiple diffusers in an array: $p = 4 \cdot (n - 1)$

p = required quantity of CP-HELLA pins

n = number of HELLA diffusers in the array

EC-HELLA

End-cap

Description

The end caps on HELLA diffuser are part of the frame that covers the installation cut-out in ceiling when a single diffuser is installed. EC-HELLA shall be detached from diffuser when installed in array of multiple diffusers.

Design

EC-HELLA is made from aluminium profile with anodized or painted surface.

The end cap can be attached to the diffuser by screws, that are included in package of EC-HELLA
