

## Efficient fan heater for energy optimized comfort

Panther FC 6-15 is a range of very quiet and efficient fan heaters intended for heating and drying in, for example, workshops, sport halls, shops and meeting rooms. Together with the FC control system, the fan heater can provide fully automatic room heating adaptable to each unique area of use.

### Quiet and effective

Panther FC 6-15 is a very quiet and efficient fan heater for stationary use contributing to a better indoor climate for medium-sized premises. This fan heater provides fast and efficient heating.

### Intelligent control system

Fan heater Panther FC is prepared for, and must be completed with, your choice of FC control system. FC allows you to optimize energy savings and comfort with minimal effort. In addition to fully self-regulating heating, smart automatic functions enable easy set-up and operation.

### Compact and robust

The fan heater Panther is compact and can easily be mounted on the wall. The heater is robust with a long service life and requires a minimum of maintenance, which reduces the risk of errors and extra costs.

### Product specifications

- Automatically adjusted fan speed, depending on heat demand, gives quiet operation.
- Supplied with a versatile wall bracket that makes it possible to direct the airflow where it's needed, downwards and to the side.
- Heat output 6-15 kW.
- Option for heat blocking to avoid unnecessary heating.
- The zone feature allows you to create different zones for different conditions.
- Can be controlled with the app Frico Control or via BMS.

## Panther FC 6-15 (IP44)

\*<sup>1</sup>) Sound power ( $L_{WA}$ ) measurements according to ISO 27327-2: 2014, Installation type E.

\*<sup>2</sup>) Sound pressure ( $L_{pA}$ ). Conditions: Distance to the unit 3 metres. Directional factor: 2. Equivalent absorption area: 200 m<sup>2</sup>. At lowest/highest airflow.

\*<sup>3</sup>)  $\Delta t$  = temperature rise of passing air at maximum heat output and lowest/highest airflow.

Approved for 380V/3ph/60Hz. Product performance for 380V/3ph/60Hz will differ from stated data.

Manufactured in Sweden with a corrosion proof housing made of hot zinc-plate and powder coated steel panels.  
Colour: white, RAL 9016.

## Dimensions

## Mounting and connection

### Mounting

The Panther fan heater is mounted on the wall with the supplied bracket. The bracket allows the fan heater to be angled downwards and to the side (30° left or right).

### Connection

The Panther fan heater is intended for permanent installation. The electrical connection is made on the back of the unit.

Panther FC is prepared for FC control system, available in several packages for different requirements. The FC packages are ordered separately. The fan heater has an integrated PC board which is connected to the selected external control system FC. Communication and sensor cables are connected to the PC board via grommets on the back on the unit.

For wiring diagrams and other technical information, please see the manual and [www.frico.net](http://www.frico.net).

Minimum distances

## Accessories

### PLR15, air director

The air director directs the airflow vertically or laterally. PLR is snapped on the front of the heater. Turning angle 0–35°.

Item number	Type	Description	Dimensions
10274	PLR15	Air director for PNF06 – PNF15	355x355x60 mm

This fan heater comes with an integrated PC-board and is supplemented with the intelligent control system FC of your choice, working together to create many smart and energy saving features. There are four different packages to choose from, depending on your requirements.

### FC Direct

#### Entry level

- Automatic fan speed control
- Calendar function
- Built-in temperature sensor
- Outlet temperature limit

### FC Smart

#### FC Direct +

- Control via app (Bluetooth)
- Wireless sensors possible
- Adjustable calendar function
- Away, Boost and Presence function
- Zone possibility

### FC Pro

#### FC Direct + FC Smart +

- Automatic heat blocking

### FC Building - BMS

#### FC Direct +

- 0-10V, potential free contact or Modbus
- Automatic heat blocking\*
- Heat and fan settings
- Alarm indication
- Read values

\* Requires outdoor temp signal

### FC Direct

Entry level control system for a great start. The fan speed is automatically adjusted in auto-mode, producing the right amount of heat with the lowest possible speed and sound level. With the calendar function, you can choose periods of comfort and reduced mode. It is possible to limit the outlet temperature. The control panel has a built-in temperature sensor, which is used for control when external sensors are not used.

### FC Smart

Second level control system for full freedom. FC Smart comes with all features from FC Direct plus additional energy saving features and the possibility of app control (Bluetooth). The app gives you access to all functions in the system, allowing you to set it up exactly the way you want it. It also enables you to create different zones with different settings in a larger system. Choose between several modes for heating only when needed, such as Away, Boost and Presence. The app FRICO CONTROL is available for both iOS and Android.

### FC Pro

Third level control system for maximum savings. FC Pro comes with all features from FC Direct and FC Smart plus additional automatic energy saving features. The heat blocking function prevents unnecessary heating, using the wireless outdoor temperature sensor.

### FC Building - BMS system

Comprehensive control system for buildings, with the option to control via 0-10V, potential free contact (e.g. a relay) and/or Modbus RTU (RS485). FC Building enables you to receive product information status and alarms. Modbus allows for full use of all the energy saving features within the control system.

Item number	Type	Description
74688	<b>FCDF</b>	FC Direct, first level control system
74689	<b>FCSF</b>	FC Smart, second level control system
74690	<b>FCPF</b>	FC Pro, third level control system
74691	<b>FCBF</b>	FC Building - BMS system

FC Control system helps to create many smart and energy saving features. In addition to our four packages, components can be added to expand and customize the system. With the app levels (FC Smart and FC Pro) it is also possible to create and control different zones. Each added zone needs to be equipped with one FC Direct and can be designed to fit its specific needs by adding different accessories. Air curtains and fan heaters with FC can be installed in separate zones in the same system.

#### FC Direct, control kit

Control panel for fan and heat, door contact and 5 m communication cable. Used for additional zones with FC Smart and FC Pro. IP44.

#### FCRTX, external room temperature sensor

For reading of the room temperature on another location than that of the control panel, incl. 10 m sensor cable. IP20.

#### FCOTX, outdoor temperature sensor

Reading the outdoor temperature, incl. 10 m sensor cable. Enables heat blocking. IP44.

#### FCLAP, local access point

Local access point for extra wireless sensors (when operating more than 8 sensors) and extended range for wireless sensors or app control (Bluetooth), incl. 10 m communication cable. IP44.

#### FCSC/FCBC, cable

FCSC Sensor cable available in 10 or 25 m for extra length. FCBC Communication cable for additional products within the same zone, available in 5, 10 or 25 m.

#### FCTXRF, indoor/outdoor wireless sensor

Indoor/outdoor wireless sensor with same features as FCRTX and FCOTX. The set up as outdoor or indoor sensor is made by a switch inside the sensor. Range up to 50 m. Battery life: 3-5 years (2xAAA). IP44.
