

SyScroll 40 to 75 Air NEW

Air Cooled Water Chillers Cooling Only
and Heat Pump
Engineering Data Manual

R410A

40.0 to 76.0 kW

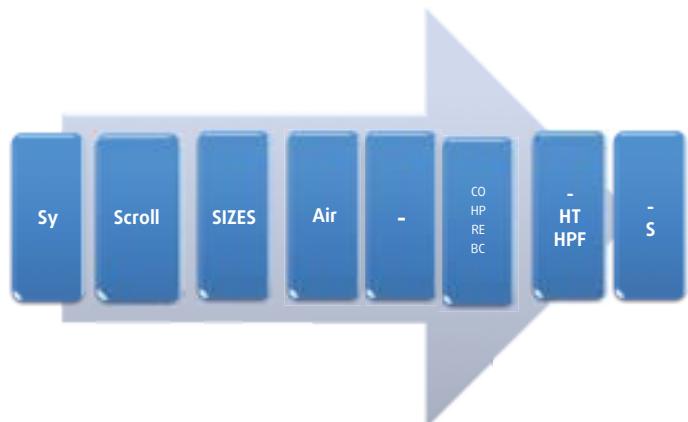

40.0 to 77.0 kW

Key points

- R410A refrigerant.
- Simple refrigerant circuit layout with one **compressor tandem**.
- Great **accessibility** to internal components for **service operations**.
- **Aeraulic independence** between refrigerant circuit and condensing side.
- **Low sound level** for BLN unit, very **low sound level** for SLN unit.
- New **display** on external panel allows the complete **control** of the unit.
- Wide **operating limits**:
 - Low water temperature applications in cooling mode (down to -8 °C).
 - High water temperature applications in heating mode (up to 55 °C).
- Fan speed control, suitable both for **low ambient temperature operation** in cooling mode and for **high ambient temperature operation** in heating mode.
- **Mechanical gauge** kit, available both factory mounted and field mounted.
- **ModBus** interface available.
- **New controller** with following functions:
 - Return and leaving water temperature control logic.
 - Dynamic set point (climatic, 4-20 mA, 0-10 V, 0-5 V, 0-1V) as standard.
 - Domestic hot water management.
 - Advanced defrost management.
 - Advanced pump management.
 - Time scheduling.
 - Double water set point.
- Remote terminal available as accessory.
- Several **options / accessories** provided with **standard delivery**:
 - phase sequence control → safe electric installation.
 - coil guard → protection during transport and installation.
 - double set-point → different daily profiles.
 - dynamic set-point → water profile in accordance with outdoor air temperature.
 - water filter → protection against impurities.
 - water differential pressure switch / water flow switch → protection against low water flow.
 - rubber pads → basic vibration attenuation.
- Optional **plug and play hydraulic** kit for last minute configuration equipped with 1 or 2 pump(s). Pumps can be supplied with or without buffer tank.
- Optional **electric heaters** fitted inside buffer tank to ensure extra heating.
- Optional **desuperheater** for partial heat recovery.
- Double **automatic air vent** (only for unit with pumps).
- **Victaulic connections** and **valves** for a easier installation.
- Double 3/8" valve on water pipes for pressure measurement and water charge/discharge.
- Easy to install **spring anti-vibration kit**.
- Dedicated versions for high ambient temperature (**HT**), reduced acoustic impact (**SLN**), need to duct exhaust air (**HPF**).

Specifications

CO = Cooling Only; HP = Heat Pump; RE = Remote Evaporator; BC = Brine for Process Cooling Application.

General

The new **SyScroll Air** air cooled water chillers have been designed and optimized to operate with **R410A** refrigerant fluid. They are available in **cooling only CO**, **heat pump HP**, **remote evaporator (RE)** and **brine for process cooling application** versions.

Each version consists of **6 sizes** and covers a nominal cooling capacity range from **40.0** to **76.0 kW** and a nominal heating capacity range from **40.0** to **77.0 kW**.

All units are equipped with **two scroll compressors in tandem** for the best operation in partial system loads.

The general operation status of the machine is continuously under the new control of an microprocessor based controller.

The units can operate **with very low water content**, thanks to the new microprocessor implementing an **auto-adaptive control logic** ensuring a total protection of the compressors at different load or water volume conditions. The minimum water volume requested is **4 l/kW**. An **on board water tank with one or two pumps** can be supplied as option. Pumps (1 or 2) can also be supplied without water tank. A **fan speed controller** can be supplied loose as field-installed accessory to allow the unit operating in cooling mode at low ambient temperature.

SyScroll Air series can be supplied with **2 acoustic options**:

- **Base Low Noise (-)**: This version is equipped with delta connected fan motors.
- **Super Low Noise (S)**: This version is equipped with star connected fan motors which allow the unit to operate with a very low rpm. Compressor sound proof jackets are also supplied as standard on this version.

To increase its application field, **SyScroll Air** ranges are available in 2 **additional versions**:

- **High temperature (HT)**: units are equipped with **inverter fans** allowing operating on a wider envelope. HT version can be supplied with BLN acoustic option only.
- **High pressure fans (HPF)**: units are equipped with **inverter fans** providing external static pressure up to 120

Pa. HT / HPF versions can be supplied with BLN acoustic option only.

Conformity with standards

The units are in conformity with the following standards:

- Machine Directive: 2006/42/EC
- Low Voltage Directive: 2006/95/EC
- Electromagnetic Compatibility Directive: 2004/108/EC
- Pressure Equipment Directive: 2014/68/EU

Cabinet

The cabinet is made of heavy gauge galvanized steel. All **galvanized steel components are individually painted** by a special painting process before the assembly of the unit. This painting system performs a homogeneous protection to the corrosion. The painting is a polyester powder based type, coloured in **RAL 7040**. The units are suitable for outdoor installation, directly on the building roof or at the ground level.

Compressors

Compressors are hermetic scroll type equipped with an inherent motor protection device ensuring protection against overheating. All compressors have direct-on-line starting and are mounted on rubber vibration isolators in order to minimize noise and vibration transmission.

A soft start system can be supplied as optional, whereas a **phase sequence monitor** is supplied as standard.

Evaporator

Indoor heat exchangers are brazed stainless steel plate type. They are insulated with a 10 mm thick closed cell polyethylene foam material and provided with male gas threaded connections. It is protected by a **35 W antifreeze electric heater** to ensure a good protection against freezing at low ambient temperature when the unit is switched off. Maximum working pressure is 10 bar at water side and 45 bar at refrigerant side.

Air cooled condenser coil

Outdoor heat exchangers are finned tubes coils. Coils are built with internally grooved copper tubes expanded into corrugated aluminium fins. Fin pitch is differentiated between the two coil configuration (condensing only, reversible) in order to optimize operating conditions.

Condenser fans

Each unit has one axial fan, fixed speed type, 800 mm diameter. According to the version, the fan is cabled in order to have **high speed** (700 to 900 rpm) for BLN version and **low speed** (530 to 680 rpm) to reduce the sound level for SLN version. The fan motor has IP54 grade and is equipped with a thermal overload protection.

A pressure actuated fan speed controller can be supplied as field-installed accessory or factory-mounted option. It allows the unit operating in cooling mode at ambient temperature down to -18 °C.

On HT / HPF versions, a brushless fan motor is controlled by a 0-10 V signal regulating the speed from 0 to 1110 rpm. This special fan allows the unit to be used in two applications:

- **High ambient temperature:** The fan provides high air flow at maximum speed in order to keep a low condensing temperature while operating at high air temperature.
- **Ducted installation:** The fan provides high static pressure in order to allow the unit to be ducted.

All types of fans are fitted with a protective grille on top.

Refrigerant circuit

Refrigerant circuit is equipped with hermetic scroll compressors tandem, sight glass, filter-drier and mechanical expansion valve (electronic expansion valve is available as an option).

Heat pump units refrigerant circuit is also provided with 4-way reversing valve, bi-flow filter drier, bi-flow expansion valve, liquid separator and liquid receiver.

Hydraulic circuit

Thanks to the design flexibility on the hydraulic circuit, all the units can be configured in several ways:

- **BASIC** unit: Unit is **without pump and tank**. The hydraulic circuit includes the following components: water filter, flow switch, 3/8" in/out water valves, water safety valve, automatic air vent, hydrometer and Victaulic connections (allowing quick connections in order to update the circuit with buffer tank and pumps). All water piping is covered with **19 mm thick insulation**.
- **1P:** **1-Pump** unit having same equipment as BASIC one + **a pump** with available static pressure of 150 kPa. Two air vents are supplied for this configuration.
- **1PT:** **1-Pump + Tank** unit having same equipment as 1P one + **a buffer tank** to be installed inside the unit. The tank is covered with 10 mm thick polyethylene insulation and is equipped with a **200 W antifreeze heater**.

• **2P:** **2-Pump** unit having same equipment as BASIC one + **2 pumps** with available static pressure of 150 kPa. Each pump can be isolated and replaced with the help of two Victaulic valves. A non-return valve is provided to protect each pump from pumping water in the discharge pipe of the other pump. Two air vents are also supplied for this configuration.

- **2PT:** **2-Pump + Tank** unit having same equipment as 2P one + **a buffer tank** to be installed inside the unit. The tank is covered with 10 mm thick polyethylene insulation and is equipped with a **200 W antifreeze heater**. In pump equipped unit, the head of the pump is insulated with a **19 mm thick insulation** to avoid condensation on it.

Serbatoio:

40-50: 98 liters

60-75: 152 liters.

Water connections are 2" male gas threaded type.

Control panel

A new optimized control is supplied on all the units with a simple user interface (possibility to customize keys functions and to set menus visibility).

In addition to standard features as water temperature control (with possibility to choose LWT/EWT probe), the control can also manage following functions.

The main features of this control system are:

- DHW control with anti-legionella function daily and weekly activated,
- Dynamic set point (4-20 mA, 0-1V, 0-5V, 0-10V),
- Double set point,
- OAT compensation,
- Boiler / Electrical heater integration,
- Autoadaptive function to reduce the water content of the plant,
- Managing of DHW 3 ways valve (ACCESSORY),
- Advanced pump management,
- Remote keyboard (ACCESSORY) with possibility to connect (up to 100 m distance) without any serial interface.

Electrical board

Electric equipment is built in compliance with CE standards. Easy accessible in front of the unit – through an access panel fixed with screws – the equipment is complete with:

- Door lock main isolating switch,
- Compressor contactors and fuses,
- Phase sequence control,

- Clamps for remote summer/winter switch,
- Clamps for external flow switch,
- Clamps for remote double set-point,
- Clamps for external interlock,
- Clamps for remote general alarm,
- Connection clamps to remote keyboard (OPTIONAL),
- Clamps for boiler relay control (OPTIONAL),
- Clamps for dynamic set-point compensation (4-20 mA, 0-1 V, 0-5 V, 0-10 V),
- Clamps for DHW 3-way valve (ACCESSORY),
- Soft-starter (OPTIONAL),
- Power factor correction capacitors (OPTIONAL).

Standard equipment

- Microprocessor card with 4 red digits, 18 LED, 4 buttons.
- Digital pressure and temperature reading kit.
- High ambient pressure control.
- Sequence phase control.
- Control circuit transformer 230 V/12 V.
- Compressor/pump hour meter.
- Main switch.
- Refrigerant R410A.
- PED approval.
- Evaporator antifreeze electric heater.
- Compressor box.
- Water differential pressure switch.

- Water filter.
- Water flow switch.

Factory-installed option:

- Coil with blue fins treatment (only HP),
- Coil with "E-Coating" treatment,
- Soft starter,
- Electronic Expansion Valve,
- Desuperheater,
- Power supply without neutral,
- Automatic circuit breakers,
- Compressors overload protection,
- Hydraulic options (1P, 2P, 1PT, 2PT),
- Fan speed control kit.

Field-installed accessories

- Compressor jacket,
- Mechanical Gauge kit,
- Water pressure switch,
- In/out valve kit,
- Remote On/Off control,
- ModBus protocol kit for BMS,
- Power factor correction capacitors,
- Sequencer for up to 4 chillers installation
- Remote terminal.
- Antivibration kit,
- Fan speed control kit.
- Power factor correction capacitors.

Accessories & Options

| SyScroll Air | Delivery | Abbreviation | Description & Benefit |
|--|-----------|--------------|--|
| Sequence phases control | Std | PHC | It allows to check the correct sense R-S-T of electric supply phases for 400/3/50 units. |
| Control circuit transformer 230V/12V | Std | TRF | Voltage transformer to provide correctly the separated voltage to the auxiliary line. |
| Main switch | Std | | Front operated switch-disconnector with direct mounted handle to cut the power Supply Line according CE standards. |
| Differential pressure switch | Std | | Prevents the operation of the unit if the circulating chilled fluid is insufficient. Checking water differential pressure. |
| Antifreeze electric heater kit | Std | EEH | Electrical Heater protects the plate exchanger. |
| Double set point | Std | DSP | Can manage two different applications (set point) selected by remote dry contact. |
| Coil Guards | Std | CG | Grilles to protect the coils. |
| Flow switch | Std | FS | Prevents the operation of the unit if the circulating chilled fluid is insufficient. It is recommended to install a flow switch to ensure the correct operation of the unit. |
| Water filter | Std | | Filter to remove impurities from the water supply. |
| Low ambient kit (pressostatic stepless fan speed control) | Option | FSC | Electronic speed controllers are designed to control the speed of fan motors in Air Cooled Chiller and Heatpump. Fan Speed controlled by Condensing Pressure in cool mode or by Air Temp in heat mode. Using variable fan speed controllers offers following benefits in commercial refrigeration or air-conditioning applications High Efficiency, Low Noise level, Low air temperature in cool mode and High air temperature in heat mode. |
| Automatic circuit breaker | Option | ACB | ACB is an automatically operated electrical switch designed to protect an electrical circuit from damage caused by overload or short circuit. Providing Magnetic and Thermal protection to Compressor motors. |
| Electronic expansion valves | Option | EEV | It is the device able to control the refrigerant flow on suction line through a stepper motor in order to keep the superheat as constant as possible. |
| Compressor Jacket | Option | CJ | Jacket for each compressors in order to reduce the sound of its. |
| Modbus protocol kit for BMS | Option | MBS | It permits the integration of the unit with BMS with Modbus protocol through RS485 port. |
| Softstarter for compressor | Option | SS | An electronic device that automatically starts up the compressors gradually. The starting current can be reduced by up to 40% of the direct on line value. |
| Power factor corrector capacitors | Option | PFC | The purpose of the power factor corrector capacitor is to minimize the input current distortion and make the current in phase with the voltage. Target is to keep Power Factor about 0.90 in any running condition. |
| Mechanical gauges kit (HP and LP manometers) | Option | KM | Pressure gauges that display the operating pressure in the high and low pressure sections of the refrigerant circuit. |
| e-coating AL/CU | Option | | It is a treatment for AL/CU coil for medium level of pollution and for marine atmosphere. |
| Desuperheater | Option | D | Additional exchanger in order to recover 20% of capacity for Domestic Hot Water application. |
| Remote On/Off control | Accessory | | It enables the operator to power on the unit when it is in standby mode, to display alarms and switch over cooling-heat pump. Maximum length: 50mt. |
| Remote keyboard panel | Accessory | | Makes it possible to control the unit through the remote terminal, up to a maximum distance of 100mt of telephone cable. |
| Sequencer for up to 4 chillers installation | Accessory | SEQ | It can easily pilot up to 4 units, chiller or heat pumps, belonging to the same family, fitted in parallel, 50 metres apart maximum. |
| Water pressure switch | Accessory | | Mechanical water pressure switch to be mounted on the field installation on installation water piping to prevent very low Water Pressure. |
| Valve in out | Accessory | | Ball valves makes it possible to insulate unit hydraulic circuit from the rest of the installation. |

Accessories are loosed and to install in the field. Options are mounted in factory.

EN 14511-2011

Starting 2012 Campaign Eurovent Certification Company took decision to start certify only performances declared in according severe European Standard EN14511.

BEFORE 2012: GROSS PERFORMANCES

Before this date all capacity performances are declared, measured and certified by Eurovent, as GROSS performances. COOLING or HEATING CAPACITY was rated without taking in account the negative contribution of the heat exchanger Pressure Drop or the positive contribution of the Head Available prevalence in example.

POWER INPUT was rated as pure sum of all power input contribution from all motors fitted on the unit. Without taking in account the correction due to power spent to win the exchanger Pressure Drop in example.

AFTER 2012: NET PERFORMANCES

After this date all data are certified according EN14511. Mainly consequences in example on Water chiller or heatpump are: COOLING or HEATING CAPACITY is now rated taking in account the negative contribution of the heat exchanger Pressure Drop or the positive contribution of the Head Available prevalence in example. In case of Water to Water unit, in example, both exchanger Pressure Drop values are taken in account in the formula.

POWER INPUT is now rated as all power input contribution from all motors fitted on the unit taking in account also the correction due to power spent to win the exchanger Pressure Drop in example.

As an important consequence of these new rules setted by Eurovent is that EER, COP and ESEER are also affected by these correction. All efficiency index are now calculated, measured and certified according new rules setted by Eurovent according EN14511.

Air to water unit (non ducted outdoor):

| | Indoor pump is an integral part | | Indoor pump is not an integral part | |
|----|---------------------------------|--|-------------------------------------|---|
| | ECC 2011 (gross) | EN14511:2011 | ECC 2011 (gross) | EN14511:2011 |
| Ph | $P_{h_m}^{(1)}$ | $P_{h_m} - \frac{q_{wi} \Delta p_{e,wi}}{\eta_{pi}}$ | P_{h_m} | $P_{h_m} + \frac{q_{wi} (-\Delta p_{i,wi})}{\eta_{pi}}$ |
| Pc | $P_{C_m}^{(1)}$ | $P_{C_m} + \frac{q_{wi} \Delta p_{e,wi}}{\eta_{pi}}$ | P_{C_m} | $P_{C_m} - \frac{q_{wi} (-\Delta p_{i,wi})}{\eta_{pi}}$ |
| Pe | $P_{e_m}^{(1)}$ | $P_{e_m} - \frac{q_{wi} \Delta p_{e,wi}}{\eta_{pi}}$ | P_{e_m} | $P_{e_m} + \frac{q_{wi} (-\Delta p_{i,wi})}{\eta_{pi}}$ |

(1) Measured with the indoor pump not running.

Where:

Ph = NET heating capacity.

Pc = NET cooling capacity.

Pe = electrical power input.

P_{h_m} = is the gross heat capacity, expressed in Watts.

P_{C_m} = is the gross cool capacity, expressed in Watts.

q_{wi} = is the nominal liquid flow rate.

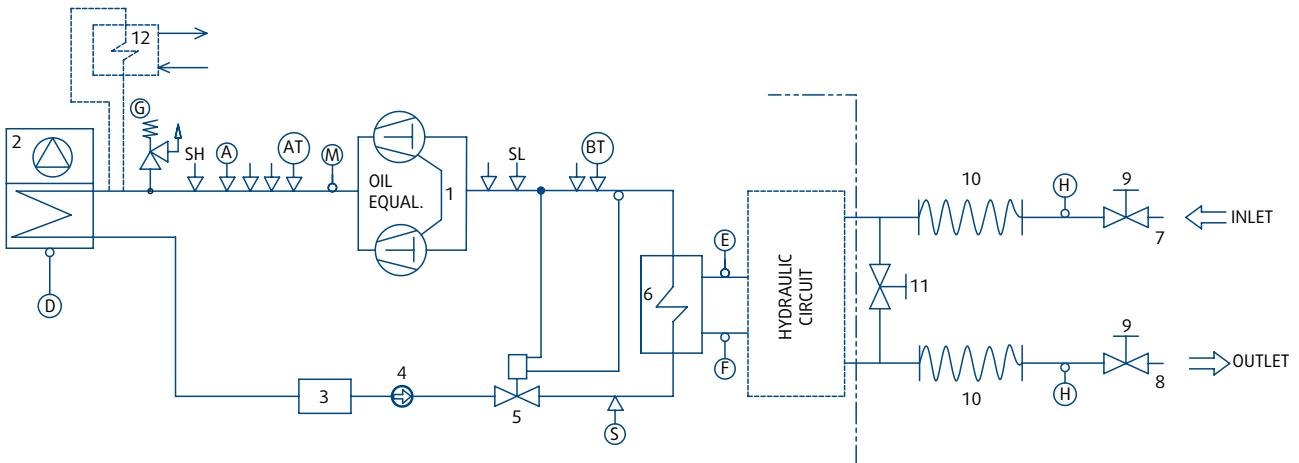

$\Delta_{pe,wi}$ = is the measured available external static pressure.

$\Delta_{pi,wi}$ = is the measured internal static pressure difference.

η_{pi} = is the efficiency of the pump.

Reference: Guidelines for the declaration of performances according to EN14511:2011 (available a copy upon request for Systemair customer).

Refrigerant Flow Diagram - Syscroll 40-75 Air CO

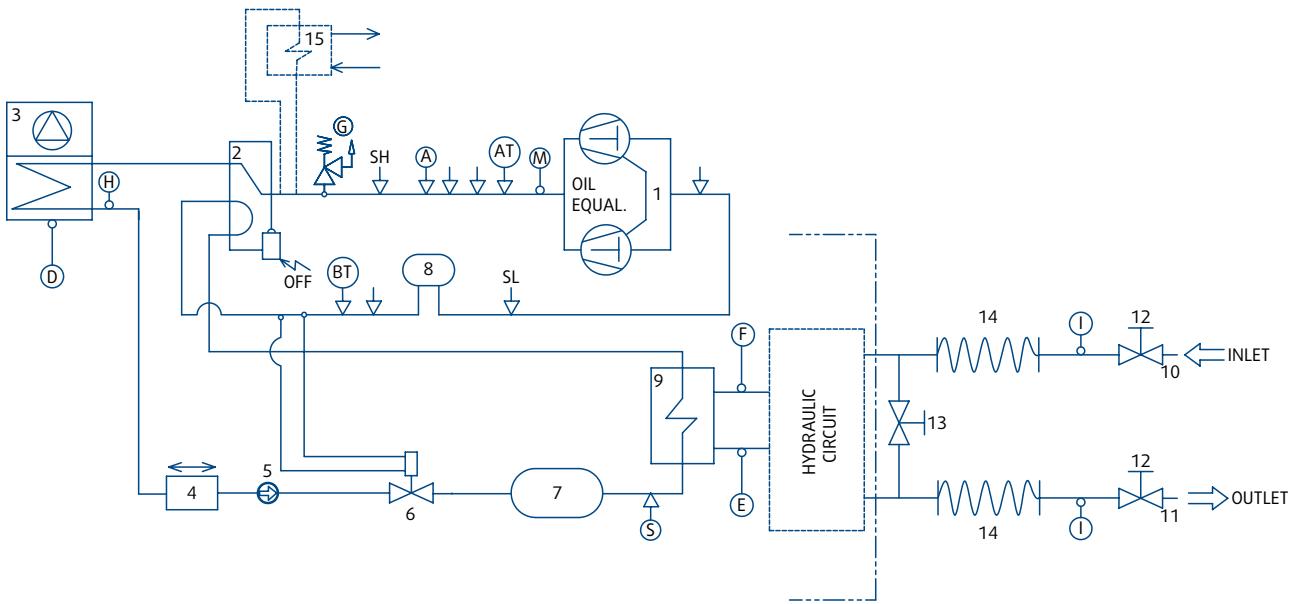

COMPONENTS

- 1 Compressor tandem scroll type
- 2 Air cooled condenser
- 3 Filter drier
- 4 Sight glass
- 5 Thermostatic expansion valve
- 6 Plate heat exchanger
- 7 Water inlet
- 8 Water outlet
- 9 In/Out valve

Performances corrective factors (brine)

Unit capacity, absorbed power, brine flow rate, brine pressure drop, have to be corrected according following formula:

CORRECTED UNIT CAPACITY

$$Q_{\text{CORRECTED/GLYCOL}} = Q_{\text{NOMINAL}} \times K_c \times K_c^{E,P}$$

Where K_c : Capacity corrective factor according to LWT ($\Delta T = 5 [K]$) → refer to [Table 1](#)

K_c^E : Capacity corrective factor according to glycol percentage (ETHYLENE GLYCOL) → refer to [Table 2](#)

K_c^P : Capacity corrective factor according to glycol percentage (PROPYLENE GLYCOL) → refer to [Table 4](#)

CORRECTED UNIT ABSORBED POWER

$$P_{\text{CORRECTED/GLYCOL}} = P_{\text{NOMINAL}} \times K_i \times K_i^{E,P}$$

Where K_i : Absorbed power corrective factor according to LWT ($\Delta T = 5 [K]$) → refer to [Table 1](#)

K_i^E : Absorbed power corrective factor according to glycol percentage (ETHYLENE GLYCOL) → refer to [Table 2](#)

K_i^P : Absorbed power corrective factor according to glycol percentage (PROPYLENE GLYCOL) → refer to [Table 4](#)

CORRECTED BRINE FLOW RATE

$$G_{\text{CORRECTED/GLYCOL}} = G_{\text{RE-CALCULATED}} \times K_f^{E,P}$$

Where $G_{\text{RE-CALCULATED}}$: Flow rate according to $P_{\text{CORRECTED/GLYCOL}}$ ($P_{\text{CORRECTED/GLYCOL}} \times 860 / \Delta T / 3600$)

K_f^E : Flow rate corrective factor according to glycol percentage (ETHYLENE GLYCOL) → refer to [Table 2](#)

K_f^P : Flow rate corrective factor according to glycol percentage (PROPYLENE GLYCOL) → refer to [Table 4](#)

CORRECTED BRINE PRESSURE DROP

$$\Delta P_{\text{CORRECTED/GLYCOL}} = \Delta P_{\text{PRE-CALCULATED}} \times K_p^{E,P}$$

Where $\Delta P_{\text{RE-CALCULATED}}$: Pressure drop according to $G_{\text{CORRECTED/GLYCOL}}$ ($K_{\text{BPHE}} \times (G_{\text{CORRECTED/GLYCOL}})^2$)

K_p^E : Pressure drop corrective factor according to glycol percentage (ETHYLENE GLYCOL) → refer to [Table 2](#)

K_p^P : Pressure drop corrective factor according to glycol percentage (PROPYLENE GLYCOL) → refer to [Table 5](#)

Table 1

| | | K_c | K_i |
|--|-----|-------|-------|
| Leaving water temperature [LWT] (°C) ($\Delta T=5 [K]$) | 7 | 1,000 | 1,000 |
| | 4 | 0,887 | 0,940 |
| | 2 | 0,816 | 0,900 |
| | 0 | 0,748 | 0,865 |
| | -2 | 0,685 | 0,826 |
| | -4 | 0,624 | 0,788 |
| | -6 | 0,568 | 0,753 |
| | -8 | 0,513 | 0,718 |
| | -10 | 0,461 | 0,683 |

Table 2

| Ethylene Glycol Percentage | | 0% | 10% | 20% | 30% | 35% | 40% |

Sound pressure level calculated at a distance of 10 metre. Sound pressure levels refer to ISO standard 3744 with parallelepiped shape.

* Sound data referred to a fan speed of 1110 rpm.

Compressor jacket (standard on SLN) can be ordered as accessory. Compressor jacket impact= -2 dB(A).
