

Installation ODK Roof

1. Loosen the eye bolts (A) and screws (B) that attach the safety wire to the fan hatches and to the casing.
2. Place the roof part (C) on the air handling unit and adjust the position to the screw holes from the removed safety wire.
3. Place the roof part (D) on the air handling unit as in step 2. Note the bend on the inner edge of the roof part. Fasten roof part (A) and (B) with the enclosed screws.
4. Attach the supplied sealing strip to the outer edges of the cover plate (E). Fasten the cover plate (F) above the electrical cabinet.
